OM MEG

Jeg er en motivert front-end utvikler som bor i Oslo.

Min teknologistabel er React, TypeScript, semantisk og tilgjengelig HTML, moderne CSS, JavaScript, Bootstrap, Tailwind, UI/UX, CI/CD, unit/e2e-testing og Figma-prototyping.

Jeg liker å fokusere på den kreative siden av et prosjekt, og synes at fonter, farger og mellomrom bør fungere harmonisk. Jeg fokuserer på sluttbrukeren for å sikre at Universell Utforming og tilgjengelighetsprinsippene anvendes.

Jeg setter også pris på de tekniske aspektene ved design, og bringer ideer til live gjennom kode.

Fullført 2024

«I am incredibly impressed with your code! It is very clean and easy to read. You have the types folder with files to ensure type safety which is best practice. I can't really fault any of your logic.»

«Excellent job with this submission! Your code is incredibly well-structured and clean, which is great to see. There was nothing I could fault regarding your submission, and the work here is of very high quality. You've gone above and beyond of what was required of you. Great job once again.»

«This is a stunning submission, one of the best I have seen (I have marked 300 of these!) There are some minor comments and praise on the PR. Well done, you nailed this.»

REFERANSER

«Fernanda is a sharp developer that approaches new subjects with a bright and intense focus. When faced with an unclear challenge, she takes the time to consider the problem from different angles and doesn't need an explanation to be given twice.

She has shown strength with JS, APIs and front-end browser technologies. I have no doubt that Fernanda will make a great fit in any company that values initiative, or calm, clear, technical thinking. All the best on your development journey!»
